## **Spring Into Volunteering-Upcoming Home Build & Repairs**

Interested in volunteering for a short-term or weekend home repair or a day on a home build site? Complete our [Volunteer Interest form](#) and we'll contact you once we begin arranging work groups!

## **Spring Into Fundraising For a Larger ReStore**

Thanks to you we've raised \$13,581.00 toward our Building a Better Future (BBF) campaign goal of \$250,000 toward the purchase of a larger ReStore building in Lebanon that can benefit people in our communities in the following 10 ways. Check out our website's [Donate](#) page to track our progress, spread the word, and feel free to [donate](#) today!

### **Top 10 Reasons How the Building a Better Future Campaign Benefits Our Communities**

#### **1**

Increased ReStore sales (that we have also been seeing the past year, thank you very much!) that come with a larger building translate to increased funds to build the two homes on Sodaville property and a multi-family residential unit on another LAHFH-owned property.

**2**

Create more local jobs in sales, store and warehouse managers, drivers, machinery maintenance, and sorters, to name a few. A quick search this season resulted in 77 posted recycling jobs in Oregon but only one in Benton and zero in Linn county. That will change with a larger ReStore.

**3**

More efficiently set up and repair mobile and other homes via our Home Repair and Preservation Program. (Click on our interest form at: <https://www.lebanonoregonhabitat.com/our-programs>)

**4**

Launch the only large-scale recycling center where we serve to collect large appliances and metals. Did you know we recycle metals from unsellable products, which goes to our home build fund?

**5**

Allow us to start an Oregon E-cycles collection site in Lebanon to recycle electronics like TV's, computers, and monitors, keeping their toxic parts out of landfills.

**6**

Have a construction area for building home stem walls during winter months, promoting year-round construction.

**7**

With more shelf space to offload box store and community donations, we can offer you more below market purchase options at once!

**8**

Create a larger area to test more product donations and stock the sales floor shelves more quickly.

**9**

House our administrative offices and training center in one building for year-round equipping.

**10**

Help advance the 2050 vision for Oregon to live within the limits of our state's sustainable share for the world's natural resources.

## Spring Into Repairs - Our Home Repair and Preservation Program

We offer home repair and preservation services to homeowners so Oregonians can continue to live in safe, decent homes for years to come. Qualifying homes are within Linn county in these ZIP codes: 97355, 97327, 97386, 97345, and 97329. Some of our home repair work includes minor and critical repairs, from painting, landscaping, and weatherization to electrical, plumbing, roofing, heating, and air. In this way, we can help revitalize neighborhoods, improve housing stability and retention for Oregonians living on low incomes, increase opportunities for homeowners to remain in their existing homes, and preserve affordable housing inventory. **Please note:** For manufactured and mobile home projects, only the following is eligible: Exterior door(s), Gutters, Landscaping, Brush removal, Junk removal, Exterior painting, Walkway(s), Driveway(s), Steps, Ramp(s), Porch(es), Deck(s), and Retaining wall(s).

**If interested, complete our online Home Repair and Preservation Program inquiry form today or contact Lebanon Area Habitat for Humanity at: 541-405-5213 for a hard copy inquiry form.**

### NEW RESTORE BUILDING DONATION FORM
